Nelson Sousa

Application Developer
São Paulo, São Paulo, Brazil

Summary

Hi there! I'm Nelson de Sousa, a 31-year-old software developer based in São Paulo, Brazil.

I hold a degree in Computer Science from Universidade Nove de Julho (UNINOVE) and a certification in Web Development from Resilia Educação.

Since 2022, I've been working as a back-end and full stack developer, contributing to impactful projects for major companies like IBM and CI&T, particularly in the banking sector.

Tech Stack / Core Skills:

- Java (Spring Boot, Spring Cloud, JPA, Validation)
- Quarkus Framework
- Messaging: Kafka, IBM MQ, RabbitMQ
- SQL, JUnit, Mockito
- API Documentation: Swagger / OpenAPI
- Service Discovery: Eureka Server / Client
- Hexagonal Architecture

Also experienced with:

- Angular 16 + TypeScript
- Spring Security
- Node.js
- HTML / CSS / JavaScript

I'm passionate about building clean, scalable, and maintainable software. Always eager to learn and collaborate on innovative projects. Feel free to explore my GitHub portfolio or reach out — I'd love to connect!

Experience

CI&T

Jr Full Stack Developer

August 2024 - December 2024 (5 months)

São Paulo

I worked on a project for a client in the banking sector, developing layouts in Angular based on Adobe XD prototypes and performing maintenance on microservices using Spring Boot.

- Collaborated in updating the Angular version of the client's application, implementing a new layout and making specific adjustments to the backend, including creating new endpoints and modifying methods as necessary.
- Tasks were managed in Jira and documented in Confluence, following the practices of the agile Scrum methodology.
- Technologies used: Angular 16, Spring Boot 3, JUnit, SonarQube, Bamboo, Bitbucket, Git, Fortify, among others.

IBM

2 years 4 months

Jr Application Developer

February 2024 - June 2024 (5 months)

São Paulo

I worked with a client in the banking sector, maintaining and developing microservices for tokenized financial assets and blockchain with Quarkus.

I used several technologies such as Kafka, IBM MQ, Swagger, docker, kubernetes, tests with Junit, CI/CD mat and several dependencies on the Quarkus Framework.

I participate in agile room rites, dailys, planning, retros and review.

Application Developer Intern

March 2022 - January 2024 (1 year 11 months)

São Paulo

I worked with a client in the banking sector, maintaining and developing microservices for financial assets with Spring boot.

I used several technologies such as Kafka, Rabbitmq, Spring Security, web, Data Jpa and Validation. Application testing with Junit and Groovy.

I participated in agile Scrum room rites, plannings, dailys, retros and reviews. using project management tools such as Jira and Cofluence.
